### **DETAILED ACTION**

Applicants have elected Group I, claims 1, 2, 4-7 and 9-23. However, the numerous sequences encompassed by the claims require too much time to search and the search is considered burdensome. Therefore, the following election of species is required.

#### ***Species Election***

1. The claims are generic to a plurality of disclosed patentably distinct species comprising numerous nucleic acid sequences. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of the first nucleic acid sequence and a single disclosed species of the second nucleic acid sequence, even though this requirement is traversed.

The species are patentably distinct because the nucleic acids encoding 76 kDa proteins are of different lengths and do not appear to have any homology. Nor do the 35 kDa or 70-76 kDa appear to have equivalent function or have homology. Therefore, the nucleic acids are patentably distinct and require separate searches. Applicants should elect one SEQ ID NO as the first nucleic acid and one SEQ ID NO as the second nucleic acid.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit:

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Wilson who can normally be reached on Monday through Friday from 9:00 am to 5:30 pm at (703) 305-0120.

Questions of formal matters can be directed to the patent analyst, Tracey Johnson, who can normally be reached on Monday through Friday from 9:00 am to 5:30 pm at (703) 305-2982.

Questions of a general nature relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-1235.

If attempts to reach the examiner, patent analyst or Group receptionist are unsuccessful, the examiner's supervisor, Deborah Clark, can be reached on (703) 305-4051.

The official fax number for this Group is (703) 308-4242.
